Education: Teaching Techniques: *Values

ABSTRACT

A self-instructional program for teachers is designed to aid in the clarification of value statements in the social studies classroom. The three statements, a method of teacher response for the clarification of student value statements, and suggested teaching strategies to promote student value statements in the classroom. Activities in the program are designed to be used individually and results are to be evaluated and compared in group discussion. Examples of dialogue to clarify value statements are included and teaching techniques to stimulate student values statements are suggested. (SHM)

TO THE PARTY OF TH

ACKNOWLEDGEMENTS

The authors wish to express gratitude to the numerous individuals who have aided them in the creation of this self-instructional program. Specifically, appreciation is extended to John McAteer of Illinois State University and Dr. Dale Kaiser, Director of the School Services Bureau of Southern Illinois University for their contributions and support. We wish to further acknowledge the valuable contributions by representatives of the Office of the Superintendent of Public Instruction, State of Illinois and of the following people for their participation in the pilot program.

THE FOLLOWING SELF-INSTRUCTIONAL PROGRAM CONSISTING OF THREE SECTIONS HAS BEEN DESIGNED FOR YOU THE READER AND WORKSHOP PARTICIPANT:

SECTION I - IDENTIFYING VALUE STATEMENTS

SECTION II - A METHOD OF TEACHER RESPONSE FOR THE CLARIFICATION OF STUDENT VALUE STATEMENTS

SECTION III - WAYS TO PROMOTE STUDENT VALUE STATEMENTS IN THE CLASSROOM

PLEASE FOLLOW DIRECTIONS CAREFULLY. TURN TO THE NEXT PAGE AND BEGIN.

SECTION I - IDENTIFYING VALUE STATEMENTS

DIRECTIONS

An essential indicator of value statements whether such statements are made by our students or by ourselves is the choice of words and phrases used to express a particular idea or feeling. The section (IDENTIFYING VALUE STATEMENTS) is made up of three activities:

- 1. Identifying fact and value statements
- 2. Learning various types of value statements
- 3. Identifying various types of value statements

DIRECTIONS for identifying fact and value statements

EACH PERSON SHOULD READ THE FOLLOWING STATEMENTS AND CHECK THE APPRO-PRIATE SPACE AS TO WHETHER YOU FEEL THE STATEMENT IS FACTUAL OR VALUATIVE IN NATURE.

1.	STATEMENT We should firmly resist any attempts to change the American way of life.	FACT	VALUE
2.	The Civil Rights Act of 1964 has been good for this country.		
3.	The Supreme Court in May, 1954 ruled that the doctrine of "separate but equal" was no longer acceptable in public education.	r	
4.	Unemployment is higher among black college graduates than white college graduates.	-	

	STATEMENT	FACT	VALUE
5.	Less variety of housing is obtainable for	1101	VILLOE
	Negro middle-class than is obtainable for		
	white middle-class.		
6.	Infant mortality is higher among blacks		
	than among whites.		
7	Theliave that there is no such that		
•	I believe that there is no such thing as a minority race.		
,			
8.	People who are not successful in America are lazy, stupid, or both.		
	are lazy, scupid, or both.		
9.	In reference to managerial jobs, for their		
	number, blacks have not been fully repre-		
	sented.		
10.	Blacks should copy the ways of the whites,		
	if they are to succeed to America.		

DIRECTIONS

WHEN YOU HAVE FINISHED, WAIT UNTIL EVERYONE IN YOUR GROUP HAS COMPLETED THE ASSIGNED TASK. AS A GROUP IDENTIFY BY PLACING A CHECK IN THE APPROPRIATE SPACE AS TO WHETHER THE ABOVE STATEMENTS CAN BE PROVEN OR ARE DIFFICULT TO PROVE ACCORDING TO THE FOLLOWING CRITERIA:

- 1. EXISTING EVIDENCE CAN BE OBTAINED FROM AUTHORITATIVE SOURCES
- 2. RELATIVE EASINESS OF CONSENSUS REGARDING THE VALIDITY OF THE STATEMENT
- 3. THERE IS LESS EMOTIONAL CONNOTATION
- 4. STATEMENT IS NOT AMBIGUOUS

Criteria:

- 1. Existing evidence can be obtained from authoritative sources
- 2. Relative easiness of consensus regarding the validity of the statement
- 3. There is less emotional connotation
- 4. Statement is not ambiguous

		Can Prove	Difficult to Prove
Statement No	. 1		
Statement No	o. 2		
Statement No	o. 3	 -	
Statement No	4 .,	<u> </u>	
Statement No	o. 5		
Statement No	o. 6		
Statement No	. 7		
Statement No	. 8		
Statement No	9	,si	· .
Statement No	. 10		

(When your group has finished go on and read the <u>Directions</u> for the next part.)

DIRECTIONS

Read and learn the two types of value statements presented below. Be prepared to use these classifications.

Preferred Value Statements

One type of value expression indicates a judgment or partiality on the part of the speaker. When something is valued in this sense, a choice or quality has been conveyed to the listener. Certain qualitative words help to identify this type of value judgment. Among these are:

good
 wrong
 bad
 like

pleasant
 dislike

. unpleasant 9. beautiful

5. right 10. ugly

Example of preferred value statements are:

1. "Like, I really dig the Afro look."

2. "It's right for the poor to stand up for their rights and demand their fair share of the economic pie."

3. "It's unpleasant to eat Negro food."

4. "I don't know what they are complaining about, if they don't like it on the reservation they can always leave."

5. "I really groove on soul music."

Asserted Value Statements

A second type of value expression is characterized by an assertation which is made without evidence supporting its validity. Frequently capitalizing upon emotional and ambiguous words, such statements generally set forth a person's opinion in a declarative manner based upon supposed factual information. Certain kinds of words help to identify these types of statements. Among these are:

ought
 could

2. should 7. have

must 8. believe

will 9. feel

5. shall 10. wish

Examples of asserted value statements are:

- 1. "Blacks will overcome."
- 2. "La Raza" has the truth.
- 3. To be a man is to have "machismo."
- 4. "Mexican-Americans could change their way of living if they really wanted to."
- 5. "Racism will never disappear."

DIRECTIONS

After studying the two types of value statements presented (and without peeking) each person should identify the following statements as to (P) for preferred value statements, (A) for asserted value statements, and (AP) if both types of value statements are implied.

1.	 It's good for poor people to keep quiet and mind their own business or else they will lose everything.
2.	 Negroes should stay out of neighborhoods where they are not wanted.
3.	 Minority groups are troublemakers.
4.	 Blacks must exert political-economic-social pressure to gain their freedom in these areas.
5.	 To "tell it like it is" is beautiful.
6.	 It's wrong for Mexican-American farm workers to organize.
7.	The poor ought to vote and take a greater interest in civic affairs.
8.	 The poor will always be with us.
9.	 Politicians are all corrupt.
0.	To like "soul-food" is cool.

~	**		~	-	~

Discuss your answers with the other members in your group. In the space provided, signify the group's consensus to each of the above statements.

No.	1.	
No.	2	
No.	3	
No.	4	
No.	5	
No.	6	
No.	7	
No.	8	
No.	9	
NI.	10	

DIRECTIONS

Ř

When your group has reached a consensus on each statement, compare your individual and group responses with those found on next page.

How did you do? Compare your responses with those below.

1.	(P)	ም	·	6.	(P)
2.	(A)		٥.	7.	(A)
3.	(AP)			8.	(A)
4.	(A)			9.	(AP)
5.	(P)			10.	(P)

When you have finished go on and read the next section.

SECTION II - CLARIFYING VALUE STATEMENTS

INTRODUCTION

A clarifying response technique occurs when the teacher asks specific types of clarifying questions to statements made by students in order to sharpen their definitions, to determine the foundation for their assertions, and to apply evidence for analysis. It is a means by which the teacher can employ questions that result in a closer inspection of value statements by students. Such teacher questions force students to contemplate in greater depth the meaning and implications of their remarks. This section (CLARIFYING VALUE STATEMENTS) is composed of three tasks:

- 1. Learn a system of clarifying value statements.
- 2. Review examples of how these responses are used.
- 3. Apply questions to student statements.

DIRECTIONS

Three types of responses are readily identifiable for clarifying student value statements. Although it is recommended that all three types of questions are used, it is recognized that in most instances the class will not need to go through all three categories. Study the following types of teacher responses and review the examples.

Clarifying Value Terms

The first type of teacher response consists of asking students to clarify or restate their assertion so that specific words or phrases which are value oriented are minimized or eliminated. The following kinds of teacher questions can be used for such a purpose.

What do you mean by	?''
"Could you state that another wa	y?"
"Can you give me some examples o	f that?"
"Please define"	
"Can you be more specific?"	
"Are you implying that	?"

(Sometimes it is helpful to ask students to give examples or for the teacher to repeat the statement so that students can reflect upon their statements and relate what they meant.)

Examples - Classroom Dialogue of Clarifying Values

Student - Blacks are disadvantaged in our society.

Teacher - What do you mean by disadvantaged, Charles?

Student - They don't have the same advantages as we do.

Teacher - Okay. We have used the term disadvantaged and we still have not conveyed anything very clear. Can you be more specific? Give me some examples of what we mean by it?

Asking for Evidence

"How do you know that?" is the second category of clarifying student value statements. It is imperative to have students relate the evidence that has led to their value judgments. For the most part students will describe very informal and non-specific evidence. As one student remarked, "I read it somewhere in a book." Such a comment needs to be expressed so that students can begin to evaluate the sources of authority used. The following types of questions can be used for this purpose.

"On what evidence do you base your judgment?"

"What makes you feel that way?"

"What evidence do you have to support that?"

"How do you know that?"

"How do you know that it's right?"

"What reasons do you have to support that?"

Example - Classroom Dialogue of Asking for Evidence

Teacher - On what evidence do you base your opinions?

Student - I've talked to people, my friends know this.

Teacher - Can you call these people experts or qualified to make judgments of this type?

Student - Well, I think they're right. Everyone is entitled to their own opinion.

Teacher - Right. Very good, but can we test these opinions against what we know?

(At this point the teacher may elect to have the class proceed to collect and analyze information for further discussion. In the meantime, if the teacher so desires, the class can engage in a discussion of possible consequences derived from student value statements.

Asking for Consequences

Two types of consequences exist for exploration by the teacher. Attempting to have students relate their assertions to some supposed action affords the class an opportunity to compare their value statements with it's implications. One consequence that should be explored has the student relate how he would react if subjected to his assertion. The most frequently used questions is for the teacher to simply ask "Bob how do you think you would act if you were in that position?" Having the student empathize with the situation offers the teacher an opportunity to have the student more deeply analyze the meaning of his statement. A second type of consequence focuses on concerns of society as a whole "How would society accept this John?" or "How would society react to such behavior?" are commonly used questions. The intent is for the teacher to have students test their perceptions with what exists in their community, state, and nation. The following questions are representative of this type of clarifying response.

"Can that be interpreted another way?"

"What other alternatives are there?"

"Who does that affect most?"

"What does this mean for society?"

"Is there another possibility?"

"Does this promote good relationships?"

Example - Classroom Dialogue of Asking for Consequences

Teacher - Alright, now that we have noted your feelings toward certain minority groups, let's see how they may affect you as an individual. If large numbers of people believe that Negroes are lazy and inferior, what does this mean for Negroes? Try to place yourself in a black man's shoes.

Student - What are you getting at?

Teacher - How would you as a Negro feel? What would you do?

Student - Well, I guess I wouldn't feel so good if I thought some people, especially if they numbered in the millions, thought I was inferior.

Teacher - But let's go one step further. What would you do and what does this mean for society?

Student - I guess I'd be unhappy.

Teacher - Can you think of certain actions you would take?

Student - I'd try to work hard and do that which would make me be liked.

Teacher - But what if you weren't allowed to? What if you couldn't, what would you do then?

DIRECTIONS

You will find listed below three student comments. Assume that you are the teacher and write a clarifying response using all three of the responses learned in the above material.

- 1. Clarifying value terms
- 2. Asking for evidence
- 3. Asking for consequences

Student Statement

"The poor depend on the church too much. They should worry more about working harder."

SECTION III. WAYS TO PROMOTE VALUE JUDGMENTS IN THE CLASSROOM

DIRECTIONS

Numerous teaching strategies exist by which social studies teachers can stimulate and bring out latent values from their students. The following techniques are not fool proof. Their success requires a teacher who is willing to assume a tolerant and non-authoritarian classroom posture. Review the following methods.

1. The Quotation

A quotation is one approach to initiate the expression of value statements. A quotation proposes a thought-provoking situation, usually by a well-known person. It should be noted that after the quotation a question, or series of questions, offers the student an opportunity to assess and express his feelings.

2. The Cartoon

The use of cartoons combines a visual experience with a dramatization of a value position. Cartoons can be employed in a number of ways:

- 1. The teacher can ask students to draw their own cartoon concerning some particular aspect under study;
- Cartoons from newspapers, magazines, and so forth may be offered so that students may write an appropriate caption;
- 3. The teacher may draw a cartoon of his own and students react as to its message; and
- 4. The teacher offers a cartoon with caption and students discuss the implications.

3. The Annotated Account

An annotated account is normally a description of an event and the factors that led up to the occurrence of the event. Studies of this type described from a personal experience are one of the most effective means by which the initiation of values can take place. Such a presentation is generally followed by questions which attempt to seek the student assessment of what has taken place. An often stated question is "What would you do if in this position?" The teacher would then have the opportunity to compare and contrast students' responses.

4. Simulation

Another device to promote student involvement and participation is the use of simulations, i.e., a device which attempts to reflect real issues of society and permits students an opportunity to explore, identify, and analyze their experiences. Having the opportunity to exercise responsibility, students can examine their values as well as those of others.
